

PREVIOUSLY APPOINTED COMMISSION MEMBERS

Mr. Coffin, Mr. Bradley, and Mr. Lane were appointed on the endowment board after changes in the university charter last November created the financial group.

HOWARD COFFIN

W. C. BRADLEY

MILLS B. LANE

New York Bankers Accept Vacancies

Continued from page 1
Coffin were named members of the commission at the June meeting of the board of trustees, following the granting of the charter amendments, and acceptance by Mr. Rentschler and Mr. Stetson of the remaining two positions on the group, as made public by Dr. Howell Saturday, completes its personnel.

Confining by the charter provisions to invest funds intrusted to them in first mortgage bonds, and high grade city, county, industrial, public utility, and railroad securities, the commission is regulated as to what percentage of such funds shall be invested in each class of securities.

Serve Varying Terms
With the personnel of the commission complete, the vacancies as may hereafter occur may be filled by the board of trustees, only from a list of nominees submitted to them by the remaining members of the commission.

First terms of office on the group were set by the amendments as ten, nine, eight, six and five years. Mr. Lane, Mr. Bradley, and Mr. Coffin were named for the first three terms respectively, and Mr. Rentschler and Mr. Stetson will fill the remaining two terms. Successive terms will be for ten years' duration.

Both the new members of the commission are recognized as leaders in financial and industrial circles of the country. Mr. Rentschler is a native Ohioan, while Mr. Stetson, an alumnus of Mercer, was born near Hawkinsville and was at one time a resident of Macon, serving a term as president of the chamber of commerce.

Mr. Rentschler Is Ohioan
Mr. Rentschler was born in Hamilton, Ohio, Nov. 25, 1896. He is the son of George Adam Rentschler, whose parents came to this country from Germany. Gordon Gordon Rentschler was graduated from Princeton in 1907 as president of his class. He was made a life trustee of Princeton university in 1920, and serves in a similar capacity on the board of Antioch college.

Following his graduation, Mr. Rentschler went to work in his father's foundry in Ohio, and devoted his energies to the manufacture of castings and machinery. He still maintains an interest in this industry and is at present director of many machine manufacturing companies.

At the time of the Miami river flood, which laid waste Dayton, Hamilton and the Miami river valley, of Ohio, in 1915, Mr. Rentschler played an important part in relief work and helped secure legislation resulting in the creation of the Miami Conservatory district which raised \$85,000,000 through bond issues to render impossible a recurrence of such a disaster.

His interest in the building of the conservatory machinery took him to the Ohio river valley where he was instrumental in the

pay for their machinery. Later he represented the National City bank then under the presidency of Charles E. Mitchell, in securing payments on credit extended the Cuban planters at top prices on sugar.

Becomes President
In 1925, he was elected vice president and assistant to the president of the National City bank and its affiliate, the National City company. On April 2, 1929 Mr. Mitchell resigned as president of the bank to become chairman of the board of directors and Mr. Rentschler succeeded him in the presidency. He is also a director of the National City company and of the City Bank Farmers Trust company.

In 1927, Mr. Rentschler married Mrs. Mary Coolidge Atkins, of Boston. He has one child.
Mr. Rentschler is director of the Postal Telegraph and Cable company; Hooven, Owens, Rentschler company; the International Banking corporation; Niles-Belmont-Pond; United Aircraft and Transport corporation; Pratt and Whitney; General Machinery corporation; the International Standard Electrical corporation and Miami Conservatory district.

A few weeks after his induction to the presidency of the National City bank, it was declared the largest bank in the United States. Its assets were more than \$1,800,000, and its deposits exceeded \$1,300,000,000. Subsequently it was passed by the Chase National bank, but it remains one of the great banks of the world. Its assets on June 30, 1930, had passed \$2,078,000,000, and its deposits had increased by \$200,000,000 to \$1,650,000,000. It has 45 branches in Greater New York and the National City company has more than 50 branches in the United States. The bank has 99 branches in 24 foreign countries.

Mr. Stetson Goes to Mercer
Mr. Stetson was born 47 years ago near Hawkinsville, and moved to Macon in the early part of his life. He was a member of the Mercer university class of 1901, and later began work in the American National bank as a collector and runner. He was promoted to the position of paying and receiving teller.

A position was offered him in the Fitzgerald bank and he went to Fitzgerald to become assistant cashier there. He married Miss Josephine Shaw in Fitzgerald. After her death he married Miss Lois Wise.

At about 1907 he returned to Macon and organized the Citizens National bank, of which he was president for a number of years. Later the bank was controlled by the Fourth National, and he was offered a position as an executive officer of the Guaranty Trust company in New York. About 15 years ago he went to the Guaranty Trust company, and has been associated with the present president of

senior vice president of the institution.

Interested in Macon Firms
He was at one time president of the Macon chamber of commerce and now holds interests in a number of Macon firms. He is a member of the board of directors of the Bibb Manufacturing company and the Coca-Cola company.

Co-Eds Can't Act Like Gentlemen

(Continued from page 1)
ing our opinions on present conditions plus hearsay evidence, we are convinced that if any classroom discussions have taken place heretofore, it was the prof who did the discussing. By way of being original, we might take time here to add that, that said male population probably furnished—and oh how well—the cussing! (Apologies)

Sweet Sour Grapes
As for disposition, character, and reputation, we feel that we are as harmless a bunch as ever

came down the pike. The young gentlemen, agree no doubt, with much more emphasis that we are, but they 'darn't let us hear for we are sweet, sensitive young things; quite easily crushed by their harsh masculine criticism.

And now, young gentlemen (famous first words) we ask you, need you ignore us so cruelly? Need we be specially ostracized on the campus, simply because we plead guilty to the charge of being co-eds? liberally, do we hinder the hypothesis classroom discussions? Are we unpleasantly grumpy in disposition, void of personality, and lacking in reputation, or just sensitive little girls in quest of education?

"It's sad but true that a co-ed is only a co-ed; but a Mercerian must be a man.

Growing Bruins Leave For Stetson

(Continued From Page 1)

tried to impress this upon their proteges. They have added several new plays to their offensive attack and Tuesday, Coach Russell went so far as to send his men through a regular scrimmage. During the scrimmage, Shorty Hollingsworth, peppy halfback and one of the best blockers on the team, sustained a ruptured blood vessel in his arm and it is doubtful whether or not he will be able to play in this game or in the game with Carson Newman on the following week.

Hollingsworth Out
With the loss of Hollingsworth, the starting Bruin backfield against Stetson will be something like this: Pinky Walden at quarterback, Bradford Lamson and Johnny Cimperman at halves, and Jody Matt at fullback. The same forward wall will start off as the one which showed such a great display of strength against Birmingham-Southern. This includes Ralph Ricketson and Tom Veazey.

ends, Lamar Pinkett and Frank Branch, tackles, Dick McVane and Bob Sperry, guards, and Robert Smith, center. For reserves, Coach Russell will have White Wilder and Fat Atchley, tackles, Roy Johnson and Red Marshall, ends, Red Bailey and Venable, guards, Seryak, center, Murphey, Barton, and Cooper, backfield men.

Stetson will no doubt give the Bears plenty of trouble. The scout who looked 'em over for Coach Russell last week stated that the Florida's had a versatile attack and showed signs of much power. Then too, they will have the advantage of fighting in their own back yard, and are more used to the climate in that part of the country than Mercer's gridders, many of whom hail from the far-distant North. But you can't tell what these Bears will do. Last Saturday's game is proof enough of this: They may win by a margin of four or five touchdowns and then again they might lose by a mere safety.

Following the game with Stetson, Mercer will begin practicing for their final two games of the season. The Bears meet Carson Newman on November 7th and Oglethorpe on November 22nd. Both games will be played at home

The beams of G-E floodlights at Georgia Tech's Grant Field can be adjusted to illuminate track meets as well as football games.

G-E Floodlighting Wins Favor for Football - Hockey - Track - Baseball - Tennis

G-E floodlighting equipment has a winning record. Its victories are counted in terms of pleased spectators, increased attendance, satisfied coaches and players.

The development of G-E athletic-field floodlighting equipment was planned with every consideration for the fundamental and special playing conditions it must meet. That is why the big Novalux projectors give ample and evenly diffused light over the entire playing area.

The development of General Electric floodlighting equipment has largely been the work of college-trained men in the G-E organization—other college-trained men are largely responsible for the continuing leadership of General Electric in furnishing the many other products which bear the G-E monogram.
